Exploring Creative Honours and Capstone Projects

Mick Healey, HE Consultant and Researcher, Emeritus Professor University of Gloucestershire, UK

Aim and context

Our aim is to help transform institutional practices and assessment strategies through creative solutions for developing alternative and additional honours and capstone projects to meet the needs of students from different backgrounds, different subjects and different kinds of institution.

The Honours Dissertation is the traditional undergraduate capstone project undertaken by the majority of students in the UK and is often seen as the gold standard. It provides an excellent apprenticeship for students working as part of team and expands research degrees, but with increasing student diversity and growth of professional disciplines, it does not necessarily provide for all students and employers’ needs.

In the UK our focus is on creative projects at honours level which may be an alternative or additional to the traditional honours dissertation; in many other countries our interest is in a creative final year and capstone projects which include a significant element of research or inquiry.

We are particularly interested in innovative ways of:

- engaging students in research, inquiry and consultancy, including projects which are employment and community-based;
- assessing the projects and ensuring consistency of challenge and standards;
- disseminating the findings, including through exhibitions, undergraduate research conferences and other forms of public engagement.

Invitation

As part of a national funded (NTFS) project the University of Gloucestershire is collecting interesting examples of how universities in the UK and internationally are designing and assessing creative honours and capstone projects. If you have an interesting example please contact Mick Healey (mhealey@glos.ac.uk) and see the proforma at: http://insight.glos.ac.uk/tli/activities/ntf/creativehonoursandcapstoneprojectshekthesis/pages/default.aspx

Examples

Engaging students in applied research through a community sports development consultancy project at University of Central Lancashire, UK

The final year Community Sports Development module acts as a capstone module for Sports Coaching students which is taken in addition to the honours dissertation. Students work as a project team through a consultancy brief with a partner agency and recommend strategies that can be employed to support community development through a community sport and coaching initiative. There are normally 8-12 consultancy briefs divided up among the 40-50 students, with students creating their own consultancy teams. Examples include: a) ‘A health check’ of football refereeing in Blackburn; b) Community Sport and Crime Reduction; and c) Community Sport (“Street Dance”).

Senior Capstone at Portland State University, US

During the final year each undergraduate student is required to participate in a Senior Capstone, the culmination of the University Studies program. The Senior Capstone is a community-based learning experience that a) provides an opportunity for students to apply the expertise they have learned in their major to real issues and problems in the community; and b) enhances students ability to work in a team context necessitating collaboration with persons from different fields of specialization. Each student works with a team of students and faculty. Each Senior Capstone must result in some form of summation, closing project, or final project that produces to the students’ experience.

Dissertation run

Modelling the research experience: tourism students’ virtual conference at University of Lincoln, UK

In May every year, final-year Tourism students at the University of Lincoln participate in a live virtual conference. This is part of their assessment for the semester-long unit. Students submit a full conference paper, but it is only a summary that appears on the conference website. During the specified timeframe of one week, students can participate at any time. Each student is also required to post a comment on another conference paper.

Biology start up business final year project, University of Durham, UK

Biology Enterprise is a collaborative venture between Durham Business School and the School of Biological and Biomedical Sciences. The module is project-oriented with self-selecting groups of students who generate an idea for a business opportunity that is based on a scientific discovery. Students use their knowledge and understanding of science to develop and research their idea into a technology that can be readily commercialised e.g. a diabetes breath tester, a biodegradable chewing gum. In parallel, the Business School teaches students the necessary skills and knowledge required to develop their idea into a successful business.

Key characteristics

- Projects which students undertake towards the end of their undergraduate degree usually in their final or senior year
- Students engage in a significant amount of independent research or inquiry (reaching the conceptions of ‘research’ in their discipline)
- Wider than the traditional honours dissertation (typically an independent piece of research presented as an 8-10,000 word extended essay) in their:
  - conception (e.g. collaborative projects as part of a research group; consultancy projects);
  - function (e.g. synthesising capstone projects; preparatory projects for transition into a profession);
  - form (e.g. student group projects);
  - location (e.g. employer and community-based projects); and/or
  - how they are disseminated (e.g. through exhibitions, undergraduate research conferences and other forms of public engagement).

Project dimensions

- Additional to honours project
- Citizen based
- Undertaken at the University
- Research preparation
- Student learning centred
- Discipline based
- Student initiated
- Individual
- Original to the student
- University audience
- Assessed by academics
- Individual supervision

Alternative to honours project

- Employer / community based
- Distance learning
- Professional / employment preparation
- Outcome product centred
- Multi- or interdisciplinary
- Teacher / supervisor initiated
- Group
- Original to the discipline
- Professional / public audience
- Emphasising synthesis of knowledge / skills
- Assessed by peers / professionals
- Group / peer supervision

Acknowledgement

Thanks to Ruth Healey for designing the poster.
