

STUDENT to SCHOLAR

Authors: Tim O'Neil, Kelly Green, and Darla Duncan; Oklahoma State University

Through undergraduate research opportunities at OSU, we encourage students to move from answering questions to asking them, and from thinking collectively and working independently to thinking independently and working collaboratively. Our program takes a progressive approach that reflects the influence of technology and generates transformative learning.

An Undergraduate's Pursuit of Discovery

"It gave me a creative edge when talking with employers. It showed I had more to offer than decent academic grades, and showed that I was a leader in my academic community."
 John Miskelley
 Niblack Research Scholar

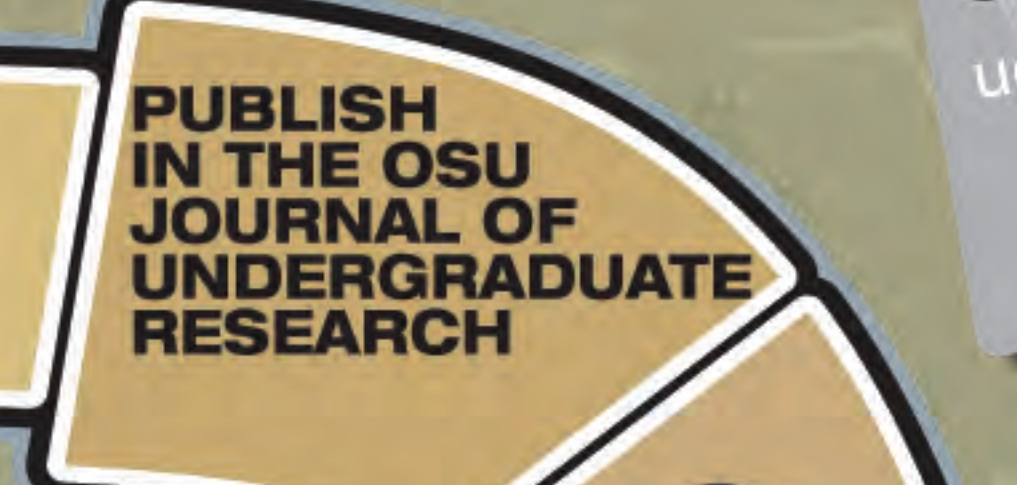

"Research is not over after you answer your initial question, because...you often come up with even more questions."
 Juliet Ellison
 Freshman Research Scholar

EARN WENTZ COLLECT \$4,500

Wentz Scholars
 50 annual awards \$4,500 each
 minimum 12 hours, any discipline, earn credit hours, Fall & Spring semesters

Undergraduate Research Network
 Join the URN, an online community connecting student researchers to faculty and undergraduate research opportunities across campus.

"It's an incredible opportunity to grow as a student, professional and person. It's difficult to express all the ways this program has touched my life; it made me wonder what else was out there waiting for me. I'm now reaching for goals that I once believed were far out of my reach."
 Jenny Lessley
 Niblack Research Scholar
